💬 [Praise Ossy Nwoye](#)

SUMMARY

Dedicated Analyst with expertise in designing, implementing, and analyzing quantitative and qualitative data using Python, scikit-learn, MySQL, Power BI, and Excel. Skilled in data preprocessing, statistical analysis, and visualization to generate actionable insights, as demonstrated by achieving 81% accuracy in predictive models. Experienced in managing datasets, drafting reports, and supporting cross-departmental collaboration. Completed Data Science certificate from Axia Africa School of Data. Committed to advancing evidence-based decisions and leadership in the health and infrastructure sectors.

EXPERIENCE

Zebcha Infrastructure

Analyst

March 2025 – Present, Abuja

Zebcha Infrastructure is a project management and advisory firm specializing in project development, financial advisory, and transaction advisory services for infrastructure and energy initiatives.

- Levelized Cost of Electricity (LCOE) Analysis: Calculated the LCOE for a \$2.4 billion solar project using Excel, delivering critical financial metrics to assess project viability and guide investment decisions.
- Electricity Sector Data Analysis: Conducted data gathering and analysis for the M300 project, identifying key trends in Nigeria's electricity supply, demand, and infrastructure development to support strategic planning.
- Data Cleaning and Standardization: Cleaned and standardized large datasets from diverse sources in Excel, ensuring accuracy and reliability for strategic reporting and stakeholder decision-making.

Spitze Construction Limited

Internship

March 2023 – September 2023, Abuja

Spitze Construction Limited is a construction and engineering firm focused on delivering high-quality projects across various sectors, including residential, commercial, and infrastructural development.

- Site Preparation and Excavation Supervision: Supervised site preparation and excavation activities, ensuring that all initial groundwork was completed effectively for residential buildings up to the lintel level.
- Active Participation in Setting Out: Actively participated in the setting out process, ensuring accurate alignment and positioning of structures according to design specifications.
- Interpretation of Building Plans: Worked under the site engineer to interpret building plans for workers, ensuring correct placement and dimensions of reinforcement in line with project specifications.

Julius Berger Nigeria PLC

Internship

August 2022 – September 2022, Abuja

Julius Berger Nigeria Plc is a leading construction company in Nigeria, renowned for its expertise in civil engineering and infrastructure development.

- Collaboration with Site Engineer: Worked closely under the supervision of the site engineer to ensure the successful execution of various building projects, facilitating effective communication and coordination among team members. Interpreted and explained building plans to workers, facilitating clear communication and understanding.
 - Interpreting Building Plans: Responsible for interpreting and explaining building plans to workers, ensuring that all team members understood the project specifications and requirements necessary for accurate implementation.
 - Monitoring Construction Activities: Actively monitored construction activities to ensure adherence to quality standards and project specifications, which is crucial for maintaining safety and structural integrity throughout the construction process.
-

EDUCATION

Covenant University (2019)

Bachelor of Engineering in Civil Engineering

SKILLS

- **Data Analysis and Visualization:** Power BI, Excel, Tableau, Python (Pandas, NumPy, Stream-lit)
 - **Machine Learning:** scikit-learn, statistical modelling, predictive analytics
 - **Database Management:** MySQL, data cleaning, data standardization
 - **Other:** Prompt Engineering, Excellent Communication, Problem Solving, Cross-departmental Collaboration
-

PROJECTS

Data Cleaning and Exploratory Data Analysis of Layoffs Dataset

Performed comprehensive data cleaning and exploratory analysis on a global layoffs dataset using MySQL. Identified and resolved inconsistencies, removed duplicates, and standardized fields to improve data quality. Delivered actionable insights on layoff trends by industry, company stage, and geography for stakeholder reporting.

Data Cleaning and Analysis of Adventure Works Dataset

Conducted end-to-end data cleaning and analysis on the Adventure Works dataset using MySQL. Restructured tables, resolved data integrity issues, and performed exploratory queries to uncover sales and customer behavior trends, producing clear and actionable insights for business decision-making.
